EXAMINER'S ACTION

Art Unit: 1513

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-17, and 24-36, drawn to a printed circuit board, classified in Class 428, subclass 901.

Group II. Claims 18-23, and 37-41, drawn to a method of making a circuit board, classified in Class 427, subclass 90.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the product can be made by a different process such as by laminating the conductive metal onto the substrate.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Atty: Douglas Robinson on Sept 26th 1994 to request an oral election to the above restriction requirement, but did not result in an election being made.
